PROFESSIONAL SUMMARY

Business systems and process automation professional with 20+ years of experience in operations management, workflow optimization, and enterprise system implementation. Experienced in implementing ERP, CRM, HRMS, workflow automation systems, and operational dashboards that improve efficiency, accountability, and visibility across teams and project locations. Skilled at translating operational challenges into structured digital systems and driving organization-wide adoption through governance frameworks such as CARMA (Create, Align, Report, Monitor & Audit).

KEY ACHIEVEMENTS

- Led implementation of enterprise systems including ERP, CRM, HRMS, and Quality Management Systems.
- Implemented HRMS for labour attendance and salary calculation integrated with biometric devices across multiple project sites and factory operations.
- Designed and implemented Flow Management System (FMS) for structured task tracking across departments.
- Developed automated checklist and reminder systems for recurring operational activities.
- Built operational dashboards using Looker Studio for management reporting and visibility.
- Customized and implemented Zoho CRM workflows aligned with sales and customer lifecycle processes.
- Created internal intranet portal using Google Sites to centralize SOPs and operational documentation.
- Led system adoption across teams using CARMA governance framework.
